ACTA METALLURGICA
CONTENTS OF VOLUME 37

NUMBER 1

H. Ackermann, G. Inden and R. Kikuchi	1	Tetrahedron approximation of the cluster variation method for b.c.c. alloys
A. G. Dirks and J. J. van den Broek	9	θ-Al_2Cu formation at room temperature in metastable Al–Cu alloy films
P. Gas, S. Poize, J. Bernardini and F. Cabane	17	A new approach to correlate grain boundary diffusion and segregation deduced from experimental measurements
W. Krauss, S. K. Pabi and H. Gleiter	25	On the mechanism of martensite nucleation
Kyung Tae Hong and Soo Woo Nam	31	Kinetics of serrated flow in terms of dislocation interaction
S. Banerjee, U. D. Kulkarni and K. Urban	35	Initial stages of ordering in Ni_3Mo—thermal and irradiation ordering experiments
G. Eggeler, J. C. Earthman, N. Nilsvang and B. Ilschner	49	Microstructural study of creep rupture in a 12% chromium ferritic steel
M. A. Morris and D. G. Morris	61	Segregation structures of melt-spun Cu–Si–B alloys and their high temperature deformation behaviour
L. C. Brown	71	A new examination of classical coarsening theory
C. M. Su and T. S. Kê	79	High temperature internal friction peak in single-crystals and bamboo-crystals of aluminium after twisting and annealing
M. L. Jokl, V. Vitek, C. J. McMahon Jr and P. Burgers	87	On the micromechanics of brittle fracture: existing vs injected cracks
R. Becker, A. Needleman, S. Suresh, V. Tvergaard and A. K. Vasudevan	99	An analysis of ductile failure by grain boundary void growth
N. C. Tso, M. Kosugi and J. M. Sanchez	121	The effect of the structural energy of Cr on the Ni–Cr equilibrium phase diagram
O. Hunderi, E. Nes and N. Ryum	129	On the Zener-drag—addendum
K. Marthinsen, O. Lohne and E. Nes	135	The development of recrystallization microstructures studied experimentally and by computer simulation

X. L. He, Y. Y. Chu and J. J. Jonas	147	Grain boundary segregation of boron during continuous cooling
T. Suzuki, R. Kojima, Y. Fujii and A. Nagasawa	163	Reverse transformation behaviour of the stabilized martensite in Cu–Zn–Al alloy
J. Kameda and W. A. Spitzig	169	Hydrogen-assisted ductile fracture in porous iron
J. Ågren	181	A simplified treatment of the transition from diffusion controlled to diffusion-less growth
D. Khireddine, R. Rahouadj and M. Clavel	191	The influence of δ' and S′ precipitation on low cycle fatigue behaviour of an aluminium alloy
Y.-H. Chiao and D. R. Clarke	203	Direct observation of dislocation emission from crack tips in silicon at high temperatures
Won-Hyuk Rhee and Duk N. Yoon	221	The grain boundary migration induced by diffusional coherency strain in Mo–Ni alloy
E. Blank, P. Henriquez and W. Funk	229	Variation of fiber morphology and crystallographic orientation relationship in directionally solidified Ni–Al–Mo alloys
Zhang Jihua, Chen Shuchuan and T. Y. Hsu (Xu Zuyao)	241	An investigation of internal friction within the incubation period of the bainitic transformation
Yeon-Wook Kim, Hong-Ming Lin and T. F. Kelly	247	Amorphous solidification of pure metals in submicron spheres
B. Caroli, C. Caroli, B. Roulet and P. W. Voorhees	257	Effect of elastic stresses on the morphological stability of a solid sphere growing from a supersaturated melt
H. Rauh, C. A. Hippsley and R. Bullough	269	The effect of mixed-mode loading on stress-driven solute segregation during high-temperature brittle intergranular fracture
N. R. Moody, S. L. Robinson, S. M. Myers and F. A. Greulich	281	Deuterium concentration profiles in Fe–Ni–Co alloys electrochemically charged at room temperature
V. V. Balasubrahmanyam and S. P. Gupta	291	Kinetics of cellular precipitation and discontinuous coarsening of the cellular precipitate in Cu–Sb alloys
L. Clapham and R. W. Smith	303	Partial modification in unidirectionally solidified Al–Si eutectic alloys
K. Negita	313	Lattice vibrations and cubic to tetragonal phase transition in ZrO_2
Song Shenhua, Xu Tingdong and Yuan Zhexi	319	Determination of critical time and critical cooling rate of non-equilibrium grain-boundary segregation

Bao-Tong Ma and C. Laird	325	Overview No. 77: Overview of fatigue behavior in copper single crystals—I. Surface morphology and Stage I crack initiation sites for tests at constant strain amplitude
Bao-Tong Ma and C. Laird	337	Overview No. 77: Overview of fatigue behavior in copper single crystals—II. Population, size distribution and growth kinetics of Stage I cracks for tests at constant strain amplitude
Bao-Tong Ma and C. Laird	349	Overview No. 77: Overview of fatigue behavior in copper single crystals—III. Interpretation of crack growth kinetics and a new approach to predict fatigue life based on crack population density in specimens cycled at constant strain amplitude
Bao-Tong Ma and C. Laird	357	Overview No. 77: Overview of fatigue behavior in copper single crystals—IV. Strain and load interaction effects for tests under variable amplitude
Bao-Tong Ma and C. Laird	369	Overview No. 77: Overview of fatigue behavior in copper single crystals—V. Short crack growth behavior and a new approach to summing cumulative damage and predicting fatigue life under variable amplitudes
G. B. Olson, H. K. D. H. Bhadeshia and M. Cohen	381	Coupled diffusional/displacive transformations
U. Gahn and W. Pitsch	391	Cross-over effect of single-phase short-range ordered alloys —Monte Carlo study
D. G. Konitzer and M. H. Loretto	397	Microstructural assessment of Ti6Al4V–TiC metal–matrix composite
T. C. Lee, I. M. Robertson and H. K. Birnbaum	407	An HVEM *in situ* deformation study of nickel doped with sulfur
S. Chevacharoenkul and R. F. Davis	417	Dislocation mechanisms, diffusional processes and creep behavior in NbC_x
P. Mathur, D. Apelian and A. Lawley	429	Analysis of the spray deposition process
P. E. Donovan	445	A yield criterion for $Pd_{40}Ni_{40}P_{20}$ metallic glass
W. L. Morris, B. N. Cox and M. R. James	457	Localized surface deformation of an Al–4% Cu alloy in fatigue
C. Servant and G. Cizeron	465	Contribution to the crystallography of the bainite transformation in a high strength low alloy steel 40 NSCD 7–7–3 (AISI 300M)

X. M. Zhang, E. Gautier and A. Simon	477	Martensite morphology and habit plane transitions during tensile tests for Fe–Ni–C alloys
X. M. Zhang, E. Gautier and A. Simon	487	Orientation relationships of deformation-induced martensite in Fe–Ni–C alloys
H. Kurishita, H. Yoshinaga and H. Nakashima	499	The high temperature deformation mechanism in pure metals
Y. Liu, T. Takasugi, O. Izumi and T. Yamada	507	The influence of hydrogen on deformation and fracture processes in Co_3Ti polycrystals and single crystals
Z. M. Guan, G. X. Liu, D. B. Williams and M. R. Notis	519	Diffusion-induced grain boundary migration and associated concentration profiles in a Cu–Zn alloy
N. Christodoulou	529	Evolution of the Bauschinger effect in tension and compression in Zircaloy-2
R. Godse and J. Gurland	541	A statistical model for low temperature cleavage fracture in mild steels
M. Menyhard, B. Blum and C. J. McMahon Jr	549	Grain boundary segregation and transformations in Bi-doped polycrystalline copper
A. H. Heuer, V. Lanteri and A. Dominguez-Rodriguez	559	High-temperature precipitation hardening of Y_2O_3 partially-stabilized ZrO_2 (Y-PSZ) single crystals
V. Jayaram and C. G. Levi	569	The structure of δ-alumina evolved from the melt and the $\gamma \rightarrow \delta$ transformation
W. G. Wolfer, C. D. Van Siclen, S. M. Foiles and J. B. Adams	579	Helium solubility in solid and liquid nickel
P. Neuhaus, C. Herzig and W. Gust	587	Grain boundary diffusion of indium in nickel and nickel–indium
Y. Koyama and H. Suzuki	597	The simple hexagonal to β-Sn martensitic transition in Sn–(7.0–9.5) at.% In alloys
T. Muschik, W. A. Kaysser and T. Hehenkamp	603	Melting of Cu–In solid solutions at small superheating by droplet formation and liquid film migration
A. M. Mayes and M. Olvera de la Cruz	615	Strain effects on the thermal stability of rod eutectics
D. J. Srolovitz	621	On the stability of surfaces of stressed solids
A. D. Rollett, D. J. Srolovitz, R. D. Doherty and M. P. Anderson	627	Computer simulation of recrystallization in non-uniformly deformed metals

J. Gayda and D. J. Srolovitz 641 A Monte Carlo-finite element model for strain energy controlled microstructural evolution: "rafting" in superalloys

M. Sutcu 651 Weibull statistics applied to fiber failure in ceramic composites and work of fracture

R. M. K. Young and T. W. Clyne 663 Intra-crystalline liquation as a result of solute supersaturation in metallic slurries

J. A. Peters, J. V. Bee, B. Kolk and G. G. Garrett 675 On the mechanisms of tempered martensite embrittlement

N. Behnood and J. T. Evans 687 Plastic deformation and the flow stress of aluminium–lithium alloys

F. F. Lange 697 Densification of powder rings constrained by dense cylindrical cores

V. Raman, T. Watanabe and T. G. Langdon 705 A determination of the structural dependence of cyclic migration in polycrystalline aluminum using electron channeling pattern analysis

A. H. Chokshi and T. G. Langdon 715 The influence of rolling direction on the mechanical behavior and formation of cavity stringers in the superplastic Zn–22% Al alloy

V. Raman and T. G. Langdon 725 An examination of cyclic grain boundary migration and cavitation in an Al–3% Mg solid solution alloy

P. Lin, S. S. Lee and A. J. Ardell 739 Scaling characteristics of dislocation link length distributions generated during the creep of crystals

NUMBER 3

M. Kato, M. Wada, A. Sato and T. Mori 749 Overview No. 78: Epitaxy of cubic crystals on (001) cubic substrates

Yiwen Mou and H. I. Aaronson 757 The carbon–carbon interaction energy in alpha Fe–C alloys

S. C. Lim, M. F. Ashby and J. H. Brunton 767 The effects of sliding conditions on the dry friction of metals

J. W. Cahn 773 Interfacial free energy and interfacial stress: the case of an internal interface in a solid

B. C. Muddle and I. J. Polmear 777 The precipitate Ω phase in Al–Cu–Mg–Ag alloys

C. P. Luo and G. C. Weatherly 791 The crystallography of heterogeneous nucleation in a Ni–45 wt% Cr alloy

J.-E. Bidaux, R. Schaller and W. Benoit 803 Study of the h.c.p.–f.c.c. phase transition in cobalt by acoustic measurements

V. Perovic and G. C. Weatherly	813	The β to α transformation in a Zr–2.5 wt% Nb alloy
B. Fultz	823	Kinetic paths in two order parameters: theory
S. P. Ringer, W. B. Li and K. E. Easterling	831	On the interaction and pinning of grain boundaries by cubic shaped precipitate particles
S. V. Raj and T. G. Langdon	843	Creep behavior of copper at intermediate temperatures—I. Mechanical characteristics
W. Mader and M. Rühle	853	Electron microscopy studies of defects at diffusion-bonded Nb/Al_2O_3 interfaces
O. Popoola, M. F. Denanot, P. Moine, J. P. Villain, M. Cahoreau and J. Caisso	867	Microstructural and analytical characterization of TiN_x precipitation in N^+ implanted equiatomic NiTi alloys
R. Duclos, J. Crampon and B. Amana	877	Structural and topological study of superplasticity in zirconia polycrystals
A. K. Jena, A. K. Gupta and M. C. Chaturvedi	885	A differential scanning calorimetric investigation of precipitation kinetics in the Al–1.53 wt% Cu–0.79 wt% Mg alloy
N. N. Thadhani, A. H. Mutz and T. Vreeland Jr	897	Structure/property evaluation and comparison between shock-wave consolidated and hot-isostatically pressed compacts of RSP Pyromet 718 alloy powders
A. G. Evans and J. W. Hutchinson	909	Effects of non-planarity on the mixed mode fracture resistance of bimaterial interfaces
M. S. Hu and A. G. Evans	917	The cracking and decohesion of thin films on ductile substrates
Chung-Min Chang and S. K. Varma	927	Vacancy versus pipe diffusion mechanisms for subgrain growth in OFHC copper
C. Templier, J. C. Desoyer, H. Garem and J. P. Riviere	933	Rhomboedron structure of xenon bubbles in Xe implanted Al
T. Watanabe, H. Fujii, H. Oikawa and K. I. Arai	941	Grain boundaries in rapidly solidified and annealed Fe–6.5 mass% Si polycrystalline ribbons with high ductility
A. Landau, G. Kimmel and M. Talianker	953	Deformation induced transformation in as-quenched uranium–4 at.% titanium alloy
G. M. Swallowe, J. E. Field, C. S. Rees and A. Duckworth	961	A photographic study of the effect of ultrasound on solidification
L. C. Lim	969	Cavity nucleation at high temperatures involving pile-ups of grain boundary dislocations—effect of solutes and impurities

S. R. MacEwen, C. Tome and J. Faber Jr — 979 — Residual stresses in annealed Zircaloy

NUMBER 4

W. W. Mullins and J. Viñals — 991 — Overview No. 79: Self-similarity and growth kinetics driven by surface free energy reduction

D. J. Miller, J. W. Sears and H. L. Fraser — 999 — Characterization of metastable phases in a rapidly solidified Nb–22Si alloy

M. R. Fitzsimmons and S. L. Sass — 1009 — The atomic structure of the $\Sigma = 13(\theta = 22.6°)[001]$ twist boundary in gold determined using quantitative X-ray diffraction techniques

J. D. L'Ecuyer and G. L'Espérance — 1023 — Precipitation interactions with dynamic recrystallization of a HSLA steel

F. W. Gayle and B. Vandersande — 1033 — Phase transformations in the Al–Li–Zr system

W. B. Hutchinson — 1047 — Recrystallisation textures in iron resulting from nucleation at grain boundaries

B. L. Vaandrager and G. M. Pharr — 1057 — Compressive creep of copper containing a liquid bismuth intergranular phase

W. D. Nix, J. C. Earthman, G. Eggeler and B. Ilschner — 1067 — The principal facet stress as a parameter for predicting creep rupture under multiaxial stresses

A. Karimi — 1079 — Cavitation erosion of austenitic stainless steel and effect of boron and nitrogen ion implantation

D. L. Davidson and K. S. Chan — 1089 — The crystallography of fatigue crack initiation in coarse grained Astroloy at 20°C

A. Tolley, D. Rios Jara and F. C. Lovey — 1099 — 18R to 2H transformations in Cu–Zn–Al alloys

V. Laxmanan — 1109 — Morphological transitions in the rapid solidification regime: a re-examination of the fundamental validity of the absolute stability concept of Mullins and Sekerka

M. J. Mayo and W. D. Nix — 1121 — Direct observation of superplastic flow mechanisms in torsion

N. Kataoka, K. Sumiyama and Y. Nakamura — 1135 — Thermal stability of nonequilibrium crystalline Fe–Ag alloys produced by vapor quenching

M. D. Dupouy, D. Camel and J. J. Favier — 1143 — Natural convection in directional dendritic solidification of metallic alloys—I. Macroscopic effects

J. Baur, W. Benoit and H. Schultz — 1159 — The dislocation–internal friction peak γ in tantalum

S. Sircar, J. Singh and J. Mazumder — 1167 — Microstructure evolution and nonequlibrium phase diagram for Ni–Hf binary alloy produced by laser cladding

R. Maurer and H. F. Fischmeister — 1177 — Low energy heterophase boundaries in the system silver/nickel and in other weakly bonded systems

T. Leffers and P. Van Houtte — 1191 — Calculated and experimental orientation distributions of twin lamellae in rolled brass

S. Hagège — 1199 — Description en coincidence des macles de déformation dans les métaux de structure hexagonale compacte

K. S. Chan — 1217 — A new criterion for brittle-to-ductile fracture transition

A. D. Rollett, D. J. Srolovitz and M. P. Anderson — 1227 — Simulation and theory of abnormal grain growth—anisotropic grain boundary energies and mobilities

R. Shimizu and J. Harase — 1241 — Coincidence grain boundary and texture evolution in Fe–3%Si

J. G. Conley, M. E. Fine and J. R. Weertman — 1251 — Effect of lattice disregistry variation on the late stage phase transformation behavior of precipitates in Ni–Al–Mo alloys

D. C. Agrawal and R. Raj — 1265 — Measurement of the ultimate shear strength of a metal–ceramic interface

1271 — *Editor's Note*

M. F. Ashby — 1273 — Overview No. 80: On the engineering properties of materials

Y. M. Koo and J. B. Cohen — 1295 — The structure of GP zones in Cu–10.9at.% Be

W. A. Świątnicki and M. W. Grabski — 1307 — Boron influence on grain boundary dislocations mobility in Ni_3Al

C. Y. Barlow and N. Hansen — 1313 — Deformation structures in aluminium containing small particles

C. McCullough, J. J. Valencia, C. G. Levi and R. Mehrabian — 1321 — Phase equilibria and solidification in Ti–Al alloys

H. Inui, H. Mori and H. Fujita — 1337 — Electron irradiation induced crystalline–amorphous transition in ceramics

K. T. Miller and F. F. Lange — 1343 — The morphological stability of polycrystalline fibers

A. Dolgopolsky, V. Karbhari and S. S. Kwak	1349	Microcrack induced toughening—an interaction model
C. A. Volkert and F. Spaepen	1355	Crossover relaxation of the viscosity of $Pd_{40}Ni_{40}P_{19}Si_1$ near the glass transition
M. Arita, M. Koiwa and S. Ishioka	1363	Diffusion mechanisms in ordered alloys—a detailed analysis of six-jump vacancy cycle in the B2 type lattice
N. Ryum and O. Hunderi	1375	On the analytic description of normal grain growth
T. O. Saetre, O. Hunderi and N. Ryum	1381	Modelling grain growth in two dimensions
S. J. Goodwin, F. W. Noble and B. L. Eyre	1389	Inclusion nucleated ductile fracture in stainless steel
Y. Enomoto and K. Kawasaki	1399	Computer simulation of Ostwald ripening with elastic field interactions
G. M. Bond, I. M. Robertson and H. K. Birnbaum	1407	On the mechanisms of hydrogen embrittlement of Ni_3Al alloys
May-Ying Chu, L. C. De Jonghe and M. N. Rahaman	1415	Effect of temperature on the densification/creep viscosity during sintering
R. Ramesh, G. Thomas and B. M. Ma	1421	Improvement in intrinsic coercivity of sintered Fe–Nd–B magnets by the introduction of non-magnetic dispersoids
J. Ortín and A. Planes	1433	Thermodynamics of thermoelastic martensitic transformations
A. P. Tsai, A. Inoue, Y. Bizen and T. Masumoto	1443	Kinetics of the amorphous to icosahedral structure transition in Al–Cu–V and Al–Mn–Si alloys
W. Mangen and E. Nembach	1451	The effect of grain size on the yield strength of the γ'-hardened superalloy NIMONIC PE16
M. S. Kim, S. Hanada, S. Watanabe and O. Izumi	1465	Temperature and orientation dependence of the deformation and fracture in $Ni_{75}Al_{20}Ti_5$ single crystals
R. D. K. Misra and T. V. Balasubramanian	1475	Co-operative and site-competitive interaction processes at the grain boundaries of a Ni–Cr–Mo–V steel
C. A. Hippsley and J. H. DeVan	1485	A study of high temperature crack growth in nickel–aluminide
G. M. Camus, N. S. Stoloff and D. J. Duquette	1497	The effect of order on hydrogen embrittlement of Ni_3Fe
J. Kwieciński and J. W. Wyrzykowski	1503	Kinetics of recovery on grain boundaries in polycrystalline aluminium

G. S. Reddy and J. A. Sekhar	1509	Moderate pressure solidification: undercooling at moderate cooling rates

NUMBER 6

F. R. N. Nabarro	1521	Overview No. 81: Work hardening and dynamical recovery of f.c.c. metals in multiple glide
C. Donadille, R. Valle, P. Dervin and R. Penelle	1547	Overview No. 82: Development of texture and microstructure during cold-rolling and annealing of f.c.c. alloys: example of an austenitic stainless steel
S. Nourbakhsh and P. Chen	1573	Microstructure and mechanical properties of rapidly solidified and annealed Ni–Al intermetallic alloys
C. Lexcellent	1585	Tentative de corrélation entre le fluage et la diffusion des solutions solides fortement concentrées [type CuZn(β)]
J. J. Hoyt, B. Clark, D. de Fontaine, J. P. Simon and O. Lyon	1597	A synchrotron radiation study of phase separation in Al–Zn alloys—I. Kinetics
J. J. Hoyt and D. de Fontaine	1611	A synchrotron radiation study of phase separation in Al–Zn alloys—II. Scaling
R. Monzen, K. Kitagawa and T. Mori	1619	Boundary sliding and elastic distortion in Cu bicrystals with boundary precipitates
Y. Gao, S. A. Dregia and P. G. Shewmon	1627	Energy and structure of (001) twist interphase boundaries in the Ag/Ni system
T. E. Hsieh and R. W. Balluffi	1637	Experimental study of grain boundary melting in aluminum
E. K. H. Li and P. D. Funkenbusch	1645	Modeling of the densification rates of monosized and bimodal-sized particle systems during Hot Isostatic Pressing (HIP)
M. Kaya and R. W. Smith	1657	The discontinuous coarsening reactions in the Pb–Cd and the Zn–Cd lamellar eutectic alloys—I. The driving force, initiation and the morphology
M. Kaya and R. W. Smith	1667	The discontinuous coarsening reactions in the Pb–Cd and the Zn–Cd lamellar eutectic alloys—II. Growth kinetics
G. N. Haidemenopoulos, M. Grujicic, G. B. Olson and Morris Cohen	1677	Transformation microyielding of retained austenite
T. H. Alden	1683	A theoretical study of the rate sensitivity of deformation in iron and other materials

NUMBER 7

i 1989 *Acta Metallurgica* Gold Medal

A. T. Paxton and A. P. Sutton 1693 Overview No. 83: A tight-binding study of grain boundaries in silicon

P. Šittner and V. Paidar 1717 Observation and interpretation of grain boundary compatibility effects in Fe–3.3wt%Si bicrystals

J. P. Simon and O. Lyon 1727 Phase separation in a Fe–Cr–Co alloy studied by anomalous small angle X-ray scattering

J. C. Malzahn Kampe, T. H. Courtney and Y. Leng 1735 Shape instabilities of plate-like structures—I. Experimental observations in heavily cold worked *in situ* composites

T. H. Courtney and J. C. Malzahn Kampe 1747 Shape instabilities of plate-like structures—II. Analysis

R. F. Cooper, D. L. Kohlstedt and K. Chyung 1759 Solution–precipitation enhanced creep in solid–liquid aggregates which display a non-zero dihedral angle

E. Pink 1773 The effect of precipitates on characteristics of serrated flow in AlZn5Mg1
